NOTEWORTHY PROJECTS

React Spotify Clone

📅 09/2020 - 09/2020

🔗 <https://github.com/wahjay/react-spotify-clone>

Personal Project - React, Spotify API and Firebase hosting

- Created a Spotify web interface similar to the original Spotify using Material UI and CSS
- Made use of Spotify public API to fetch user playlists to populate the frontend
- Built playback slider and volume slider to modify the currently playing song state
- Displayed current song state such as on playing, on pause, and error using conditional rendering
- Managed and shared users data among all the react components using React Context

React Real-Time Chat

📅 06/2020 - 07/2020

🔗 <https://github.com/wahjay/react-real-time-chat>

Personal Project - MERN Stack Web App

- Designed API endpoints for the frontend to interact
- Defined database schema for users information and friendship
- Implemented friend requesting, unread message notification and messaging using socket.io
- Added private messaging in addition to public messaging

WordPress

📅 03/2020 - 06/2020 📍 University of California, Los Angeles

🔗 <https://github.com/wahjay/CS144-Web-Application>

Web Application Project - MEAN Stack Web App

- Wrote API endpoints using Nodejs and Express routing
- Managed user data using MongoDB
- Developed the project as a single page application using AngularJS
- Utilized JWT token for user authentication and API authorization

Pintos Operating System

📅 06/2019 - 08/2019 📍 University of California, Berkeley

🔗 <https://github.com/wahjay/CS162-Operating-System>

Operating System Course Project

- Implemented several Pintos operating system features in C, including interprocess communication, synchronization, scheduling, and fast file system to achieve memory allocation(segmentation, paging), resource allocation, multi-threading and multi-processing
- Collaborated with a team to implement the features
- Wrote testable, readable and maintainable code

EDUCATION

Bachelor's of Science, Computer Science

[University of California, Los Angeles](#)

📅 2018 - 2020

Associate Degree, Computer Science

GPA

3.78 / 4.0

[City College of San Francisco](#)

📅 2016 - 2018

SKILLS

Programming Languages
